What are we proposing, and presenting to friend countries and international NGO's.

We propose to establish links and alliances with financial support for the achievement op plans, programs and projects included on the plan of actions of the foundation for the year 2006 – 2010, oriented to give social capacity of absortion of the impact of the conflict in this country in its current phase.

The Green Cross Foundation, conscient of maximizing the human resources gives special priority to the development of policies for the youth. It is here where we specially open up our doors for the integration of the youth in Riosucio and the world looking forward to vinculating with this NGO.

We must support for the moral development of our youth desirable values in common such as honesty, love to the work and responsibility, among others building up with criteria and expertise, which would be given by older people.

We must strive along with the youth for the most cherished ideals of peace, freedom and knowledge, regardless of political directives which are obsolete which must be taken away from young minds.

We consider that young people weapons are the reason and the intelligence with no substitutes of faith or passion. Simply, promoting the development and the knowledge must be its goal.

The Green Cross Foundation convokes in special manner to the youth to cooperate for the enhancement of our society
